SLD-35 Medium Brown

SLD-40 Green

SLD-45 Orange

SLD-50 Red

SLD-55 Violet

SLD-60 Bright Yellow

SLD-65 Dark Yellow

Smith's Liquid Dye is a concentrated solution blend of metal complex and/or high grade dyes that can be diluted with water or acetone to achieve a ready to use color system. **Smith's Liquid Dye** is formulated as a penetrating color system for polishing installation as well as a dye then seal application to properly prepared porous substrates. Although this product exhibits good light fastness, this system should be limited to interior applications.
