

Smith's VINYL CHIP

1/4" VINYL CHIP BROADCAST BLENDS

COLOR CHART

NOTE:

1. Slight color variations are common between individual mixes and batches due to differences in chemical composition, application thickness & finishing techniques as well as environmental condition variations
2. Epoxy products are not UV Stable, even with when using U.V. Absorbers &/or U.V. stabilizer additives. Expect epoxy systems to darken or amber
3. Site mock-ups are highly recommended and will best represent actual color
4. Broadcast Rate: **Full Broadcast Rate** = 0.12 to 0.2 lbs. per sq.ft. **Random Broadcast Rate** = 0.02 to 0.04 lbs. per sq.ft.
